SUMMARY

Aspiring Python Developer with hands-on experience in developing desktop applications, authentication systems, weather-based applications, and data visualization projects using Python. Proficient in Python, MySQL, Pandas, Matplotlib, Tkinter, and Object-Oriented Programming concepts. Strong problem-solving abilities, analytical mindset, and eagerness to contribute to software development projects while continuously enhancing technical expertise.

TECHNICAL SKILLS

Programming Languages: Java, Python, C++

Web Technologies: HTML, CSS, JavaScript

Database: MySQL, MongoDB

Libraries/Frameworks: Streamlit, Tkinter, CustomTkinter, Pandas, Matplotlib, Seaborn

Core Concepts: OOP, Data Structure, Database Management, Software Development Lifecycle, Data Analytics

Tools: Git, GitHub, VS Code

PROJECTS

Weather App:

Technologies: Python, Tkinter, CustomTkinter

- Real-time Weather Data Retrieval using Weather API Key From OpenWeather.
- Dynamically Image Changing based on weather condition.

Sign In Form (Nielit 'O' Level Project):

Technologies: Python, CustomTkinter

- Developed a secure sign-in system with an intuitive graphical user interface using CustomTkinter.
- Implemented input validation to ensure accurate and secure user authentication.

Monthly Expense Tracker:

Technologies: Python, Matplotlib, Pandas

- Designed and developed an expense tracking application to monitor and manage monthly expenses.
- Implemented data collection and categorization features for efficient financial record management.

EDUCATION

Bachelor of Arts (Honours) Political Science

Delhi University

CGPA: 7.27

Graduation: June 2025

CERTIFICATE

NIELIT 'A' LEVEL Certificate in Information Technology (IT)

Equivalent to an Advanced Diploma in Computer Applications and Software Development.

Nielit

Graduation: September 2025

ACHIEVEMENTS

Academic Excellence Award for scoring highest marks in Arts Stream (2023)

LANGUAGES

English, Hindi, Punjabi
